**PRIORITY  
DOCUMENT**

SUBMITTED OR TRANSMITTED IN  
COMPLIANCE WITH RULE 17.1(a) OR (b)

I, the undersigned, being an officer duly authorised in accordance with Section 74(1) and (4) of the Deregulation & Contracting Out Act 1994, to sign and issue certificates on behalf of the Comptroller-General, hereby certify that annexed hereto is a true copy of the documents as originally filed in connection with the patent application identified therein.

I also certify that the attached copy of the request for grant of a Patent (Form 1/77) bears an amendment, effected by this office, following a request by the applicant and agreed to by the Comptroller-General.

In accordance with the Patents (Companies Re-registration) Rules 1982, if a company named in this certificate and any accompanying documents has re-registered under the Companies Act 1980 with the same name as that with which it was registered immediately before re-registration save for the substitution as, or inclusion as, the last part of the name of the words "public limited company" or their equivalents in Welsh, references to the name of the company in this certificate and any accompanying documents shall be treated as references to the name with which it is so re-registered.

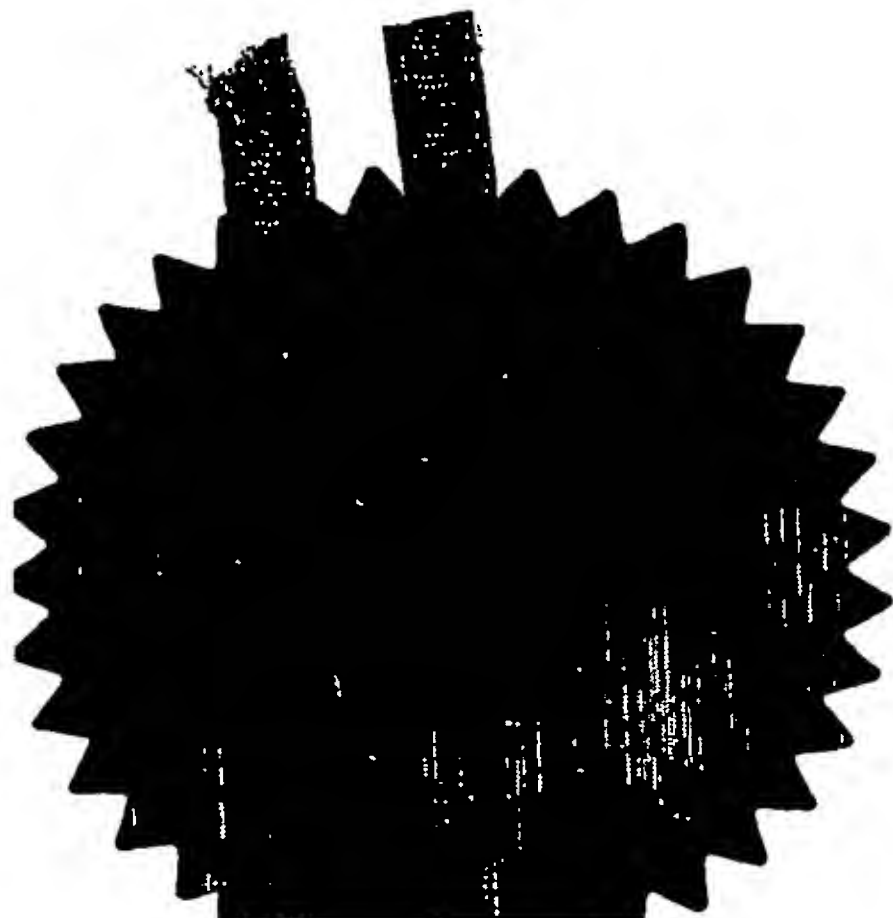

In accordance with the rules, the words "public limited company" may be replaced by p.l.c., plc, P.L.C. or PLC.

Re-registration under the Companies Act does not constitute a new legal entity but merely subjects the company to certain additional company law rules.

**Warning**

After an application for a patent has been filed, the Comptroller of the Patent Office will consider whether publication or communication of the invention should be prohibited or restricted under Section 22 of the Patents Act 1977. You will be informed if it is necessary to prohibit or restrict your invention in this way. Furthermore, if you live in the United Kingdom, Section 23 of the Patents Act 1977 stops you from applying for a patent abroad without first getting written permission from the Patent Office unless an application has been filed at least 6 weeks beforehand in the United Kingdom for a patent for the same invention and either no direction prohibiting publication or communication has been given, or any such direction has been revoked.

THE DESCRIPTION**The Romy Sail Rig**

The Romy Sail Rig is a hollow watertight oval mast 1. made of metal, plastic, material or wood which is held upright across the deck of a vessel one third the distance from the bow towards the stern by a suitable tabernacle 6. and by adjustable fore and aft stays 5. The apex of the oval mast 1. is joined at right angles aloft 9. The extreme beam of the oval mast should be three quarters of the verticle height forming a strong pointed egg shape when viewed from forward or aft. A La Teen sail and boom is held tight below the apex 9. of the oval mast. The bow end of the La Teen sail is attached to the bowsprit 4. The boom is held at 45% angle, this will allow the La Teen sail free and unrestricted deployment from the bowsprit 4. to the stern of the vessel within the oval mast and stays without fouling making for swift and easy tacking.

The hollow watertight oval mast 1. can also prevent total capsizes with small sailing vessels which operate dagger boards.
